TREE-OF-HEAVEN

SIREX WOOD WASP

ZEBRA MUSSEL

IMPORTED FIRE ANT

RAMORUM BLIGHT

CHINESE MITTEN CRAB

EMERALD ASH BORER

PHRAGMITES

SNAKEHEAD FISH

INVASIVE SPECIES are non-native plants, animals and pathogens that can harm ecosystems and human health. In places where these species already are established, they also cause millions of dollars in economic damage. THE VIRGINIA INVASIVE SPECIES WORKING GROUP needs your help to stop the spread of new invaders that are on the horizon.

RUSTY CRAYFISH

RAPA WHELK

JAPANESE STILTGRASS
